

SELEC

MFM384-C-CE-CL05

Operating Instructions

96 x 96

**SPECIFICATIONS****DISPLAY**

Liquid crystal display with backlight  
4 lines, 4 digits per line to show electrical parameters  
5th line, 8 digits to show energy  
Bar graph for current indication

**LCD INDICATIONS**

- I** - Integration of energy
- PRG** - Unit is in configuration menu
- - Communication in progress
- MAX DMD** - Maximum and Minimum Demand Power
- THD** - For Total harmonic distortion
- IM** - Import Energy
- EP** - Export Energy

**WIRING INPUT**

3 Ø - 4 wire, 3 Ø - 3 wire &  
1 Ø - 2 wire system

**RATED INPUT VOLTAGE**

11 to 300V AC (L-N) ; 19 to 519V AC (L-L) ;  
Installation Category III (600V)

**FREQUENCY RANGE**

45-65 Hz

**RATED INPUT CURRENT**

Nominal 5A AC (Min-11mA, Max-6A)

**BURDEN**

0.5 VA@5A per phase

**CT PRIMARY**

1A / 5A to 10,000A (Programmable for any Value)

**Note :** 1A to 10,000A if CT secondary is 1 else  
CT primary is 5A to 10,000A

**CT SECONDARY**

1A or 5A (Programmable)

**PT PRIMARY**

100V to 500kV (Programmable for any value)

**PT SECONDARY**

100 to 500V AC (L-L)(Programmable for any value)

**Display update time**

1 sec. for all parameters

**Display Scrolling**

Automatic or Manual (Programmable)

**POWER CONSUMPTION**

Less than 8VA

**ENVIRONMENTAL CONDITIONS**

- Indoor use
- Altitude of up to 2000 meters
- Pollution degree II
- Temperature : Operating : -10°C to 55°C  
Storage: -20°C to 75°C

Humidity : Up to 85% non-condensing

**PROTECTION CLASS : II****INSTALLATION CATEGORY : III****MOUNTING** : Panel mounting

WEIGHT : MFM384-C-CE-CL05 : 296gms

**OUTPUTS :**

Pulse Output : Voltage range : External 24V DC max.  
Current capacity : 100mA max.  
Pulse Width : 100 ms ± 5ms.

**ORDER CODE INFORMATION**

Product	Supply	Certification
MFM384-C-CE-CL05 Class 0.5S	85 to 300V AC/DC, 50/60Hz (±5%)	

**SERIAL COMMUNICATION**

Interface standard and protocol	RS485 and MODBUS RTU
Communication address	1 to 255
Transmission mode	Half duplex
Data types	Float and Integer
Transmission distance	500m maximum
Transmission Speed	1200, 2400, 4800, 9600,19200 (bps)
Parity	None, Odd, Even
Stop bits	1 or 2

**ACCURACY**

Measurement	Accuracy
Voltage V <sub>L-N</sub>	±0.5% of Full scale
Voltage V <sub>L-L</sub>	±0.5% of Full scale
Current	±0.5% of Full scale
Frequency	±0.1% For L-N Voltage >20V, For L-L Voltage >35V
Active Power	±0.5%
Apparent power	±0.5%
Reactive Power	1%
Power factor	±0.005
Active energy	Class 0.5S (IEC 62053-22)
Reactive energy	Class 2 (IEC 62053-23)
Apparent energy	Class 0.5S
MAX / MIN Active Power	±0.5%
MAX / MIN Reactive Power	±1%
MAX Apparent Power	±0.5%

**RESOLUTION :**

PT Ratio x CT Ratio	kWh / kVAh / kVarh
<15	0.01K
<150	0.1K
<1500	1K
<15000	0.01M
<150000	0.1M
≥150000	1M

**NOTE :**

- 1) For Voltage, Current and Power, resolution is automatically adjusted.
- 2) For power factor, resolution is 0.001.
- 3) **I** blinks after every 5 sec, if load is connected on any one of 3 phases.

**SAFETY PRECAUTIONS**

All safety related codifications, symbols and instructions that appear in this operating manual or on the equipment must be strictly followed to ensure the safety of the operating personnel as well as the instrument.

If the equipment is not used in a manner specified by the manufacturer it might impair the protection provided by the equipment.

- Do not use the equipment if there is any mechanical damage.
- Ensure that the equipment is supplied with correct voltage.

**CAUTION :**

1. Read complete instructions prior to installation and operation of the unit.
2. Risk of electric shock.
3. The equipment in its installed state must not come in close proximity to any heating sources, oils, steam, caustic vapors or other unwanted process by products.

**WIRING GUIDELINES****WARNING :**

1. To prevent the risk of electric shock, power supply to the equipment must be kept OFF while doing the wiring arrangement.
2. Wiring shall be done strictly according to the terminal layout. Confirm that all connections are correct.
3. Use lugged terminals.
4. To reduce electromagnetic interference use of wires with adequate ratings and twists of the same in equal size shall be made with shortest connections.
5. Layout of connecting cables shall be away from any internal EMI source.
6. Cable used for connection to power source, must have a cross section of 0.5mm<sup>2</sup> to 2.5mm<sup>2</sup> (20 to 14AWG; 75°C(min)). These wires shall have current carrying capacity of 6A.
7. Copper cable should be used (Stranded or Single core cable).
8. Before attempting work on device, ensure absence of voltages using appropriate voltage detection device.

**INSTALLATION GUIDELINES****CAUTION :**

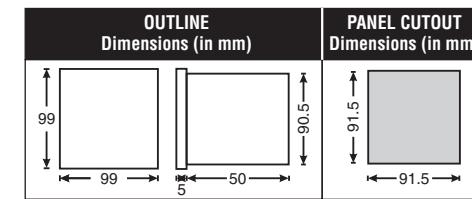

1. This equipment, being built-in-type, normally becomes a part of main control panel and in such case the terminals do not remain accessible to the end user after installation and internal wiring.
2. Conductors must not come in contact with the internal circuitry of the equipment or else it may lead to a safety hazard that may in turn endanger life or cause electrical shock to the operator.
3. Circuit breaker or mains switch must be installed between power source and supply terminals to facilitate power 'ON' or 'OFF' function. However this switch or breaker must be installed in a convenient position normally accessible to the operator.
4. Before disconnecting the secondary of the external current transformer from the equipment, make sure that the current transformer is short circuited to avoid risk of electrical shock and injury.
5. The equipment shall not be installed in environmental conditions other than those mentioned in this manual.
6. The equipment does not have a built-in-type fuse. Installation of external fuse of rating 275V AC / 0.5Amp for electrical circuitry / battery is highly recommended.

**MECHANICAL INSTALLATION**

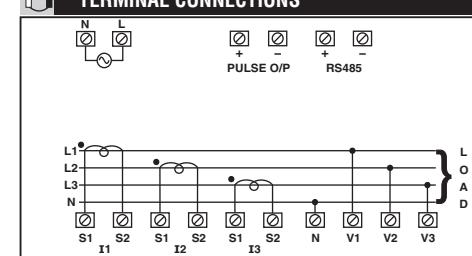

For installing the meter,

1. Prepare the panel cutout with proper dimensions as shown below.
2. Push the meter into the panel cutout. Secure the meter in its place by fitting the clamp on the rear side. Fit clamps on both sides in diagonally opposite location for optimum fitting.
3. For proper sealing, tighten the screws evenly with required torque.

Terminal screw tightening torque :  
0.68 N-m to 0.79 N-m ( 6.018 In-Lb to 6.992 In-Lb ).  
Screw clamp tightening torque : 0.1N-m ( 0.885 Lb-inch ).

**MAINTENANCE**

1. The equipment should be cleaned regularly to avoid blockage of ventilating parts.
2. Clean the equipment with a clean dry or damp cloth. Do not use any cleaning agent other than water.

**TERMINAL CONNECTIONS****FRONT PANEL DESCRIPTION****ONLINE PAGES DESCRIPTION**

There are 6 dedicated keys labeled as V, I, VAF, PF, P, E. Use these 6 keys to read meter parameters. Simply press these keys to read the parameters.

**KEY PRESS**

KEY PRESS	ONLINE PAGE DESCRIPTION
Press "V"	<b>The first screen</b> : Displays line to neutral Voltage of three phase and average line to neutral voltage. <b>The second screen</b> : Displays line to line voltage of three phase and average line to line voltage. <b>The third screen</b> : Displays total percentage harmonics of line to neutral voltage of three phase and average line to neutral voltage. <b>The fourth screen</b> : Displays total percentage harmonics of line to line voltage of three phase and average line to line voltage. <b>The fifth screen</b> : Press for 3 sec, Displays phase sequence indication. <b>Note :</b> 1) For 3 Ø 3 wire system, only the second, fourth and fifth screen will be available. 2) In 1 Ø 2 wire system only first, third and fifth screen will be available.
Press "I"	<b>The first screen</b> : Displays phase current of three phase and neutral current. <b>The second screen</b> : Displays phase maximum current demand of three phase and average current.

KEY PRESS	ONLINE PAGE DESCRIPTION
	<p><b>The third screen :</b> Displays total percentage harmonic of current of three phase and average phase current.</p> <p><b>The fourth screen :</b> Press for 3 sec, Displays current connection indication page.</p> <p><b>Note :</b> For 3 Ø 3 wire system only first, second and third screen will be available. Displays average current instead of neutral current.</p>
Press "VAF"	<p><b>The first screen :</b> Displays voltage, current, power factor of first phase and frequency.</p> <p><b>The second screen :</b> Displays voltage, current, power factor of second phase and frequency.</p> <p><b>The third screen :</b> Displays voltage, current, power factor of third phase and frequency.</p> <p><b>The fourth screen :</b> Displays average value of voltage, current and power factor of three phase and frequency.</p> <p><b>Note : 1)</b> In 3 Ø 3 wire system voltage current power factor and frequency will be line to line.  <b>2)</b> In 1 Ø 2 wire system only first screen will be available.</p>
Press "PF"	<p><b>The first screen :</b> Displays power factor of three phase and average power factor.</p> <p><b>Note :</b> For 3 Ø 3 wire system, only average power factor will be available on this screen.</p>
Press "P"	<p><b>The first screen :</b> Displays active power of three phase and total active power.</p> <p><b>The second screen :</b> Displays reactive power of three phase and total reactive power.</p> <p><b>The third screen :</b> Displays apparent power of three phase and total apparent power.</p> <p><b>The fourth screen :</b> Displays active, reactive, apparent power and power factor of first phase.</p> <p><b>The fifth screen :</b> Displays active, reactive, apparent power and power factor of second phase.</p> <p><b>The sixth screen :</b> Displays active, reactive, apparent power and power factor of third phase.</p> <p><b>The seventh screen :</b> Displays total active, reactive, apparent power and average power factor of three phase.</p> <p><b>The eighth screen :</b> Displays maximum active power demand, reactive power demand and apparent power demand.</p> <p><b>The ninth screen :</b> Displays minimum active power demand and reactive power demand.</p> <p><b>Note : 1)</b> For 3 Ø 3 wire system only seventh, eighth and ninth screen will be available.  <b>2)</b> In 1 Ø 2 wire system only first, second, third &amp; depending on the network selection the fourth or fifth or sixth screen along with eighth and ninth screen will be available.</p>
Press "E"	<p><b>The first Screen :</b> Displays import active energy of first phase.</p> <p><b>The second screen :</b> Displays import active energy of second phase.</p> <p><b>The third screen :</b> Displays import active energy of third phase.</p> <p><b>The fourth screen :</b> Displays export active energy of first phase.</p> <p><b>The fifth screen :</b> Displays export active energy of second phase.</p> <p><b>The sixth screen :</b> Displays export active energy of third phase.</p> <p><b>The seventh screen :</b> Displays total import active energy of three phase.</p> <p><b>The eighth screen :</b> Displays total export active energy of three phase.</p> <p><b>The ninth screen :</b> Displays total net active energy of three phase.</p> <p><b>The tenth Screen :</b> Displays import reactive energy of first phase.</p> <p><b>The eleventh screen :</b> Displays import reactive energy of second phase.</p> <p><b>The twelfth screen :</b> Displays import reactive energy of third phase.</p> <p><b>The thirteenth screen :</b> Displays export reactive energy of first phase.</p> <p><b>The fourteenth screen :</b> Displays export reactive energy of second phase.</p>

KEY PRESS	ONLINE PAGE DESCRIPTION									
	<p><b>The fifteenth screen :</b> Displays export reactive energy of third phase.</p> <p><b>The sixteenth screen :</b> Displays total import reactive energy of three phase.</p> <p><b>The seventeenth screen :</b> Displays total export reactive energy of three phase.</p> <p><b>The eighteenth screen :</b> Displays total net reactive energy of three phase.</p> <p><b>The nineteenth screen :</b> Displays apparent energy of first phase.</p> <p><b>The twentieth screen :</b> Displays apparent energy of second phase.</p> <p><b>The twenty first screen :</b> Displays apparent energy of third phase.</p> <p><b>The twenty second screen :</b> Displays total net apparent energy of three phase.</p> <p><b>The twenty third screen :</b> Displays run hour.</p> <p><b>The twenty fourth screen :</b> Displays Auxiliary Interrupts.</p> <p><b>Note : 1)</b> In 3 Ø 3 wire system only ninth, eighteenth, twenty second, twenty third and twenty fourth screens will be available.  <b>2)</b> In 1 Ø 2 wire system only 7th, 8th, 9th, 16th, 17th, 18th, 22nd, 23rd &amp; 24th screens will be common &amp; For P1: 1st, 4th, 10th, 13th, 19th Screen will appear. For P2: 2nd, 5th, 11th, 14th, 20th Screen will appear. For P3: 3rd, 6th, 12th, 15th, 21th Screen will appear.</p>

	<b>AUTOMATIC / MANUAL MODE DESCRIPTION</b>									
	<p>Press E (<math>\leftarrow</math>) button for 3 seconds to toggle between Automatic and Manual mode.</p> <p><b>Note :</b> By default unit operates in Auto mode. In automatic mode online pages scroll automatically at the rate of 5 seconds per page. In automatic mode when any key is pressed, unit temporarily switches to manual mode and the appropriate page is displayed, also if any key is not pressed for next 5 sec, the unit resumes automatic mode.</p>									

CONFIGURATION																																																																																																																																							
There are 6 dedicated keys with symbols marked as $\blacktriangleleft$ , $\blacktriangleright$ , $\blacktriangledown$ , $\blacktriangleup$ , $\leftarrow$ , $\rightarrow$ . Use these 6 keys to navigate into configuration menu / change setting.																																																																																																																																							
<b>Note :</b> The settings should be done by a professional, after going through this users manual and after having understood the application situation.																																																																																																																																							
For the configuration setting mode :																																																																																																																																							
<ul style="list-style-type: none"> <li>Press <math>\blacktriangleup</math> + <math>\blacktriangledown</math> keys for 3 sec. to enter or to exit from the configuration menu.</li> <li>Press <math>\blacktriangleleft</math> or <math>\blacktriangleright</math> key to move cursor left or right by one digit each time.</li> <li>Press <math>\blacktriangleup</math> or <math>\blacktriangledown</math> key to increase or to decrease the parameters value.</li> <li>Press <math>\leftarrow</math> key to go back to previous page.</li> <li>Press <math>\rightarrow</math> key to save the setting and move on to next Page.</li> </ul>

## APPLICATION OF PULSE OUTPUT

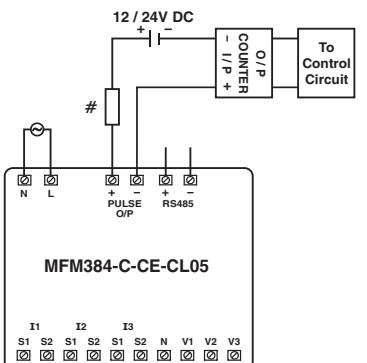

### ● PROCESS INTEGRATION

Pulse output from MFM384-C (0.5S) meter can be interfaced into a process through a PLC for on line control of energy content in the process.

If the PLC has a self excited digital input, external DC supply is not needed. The kWh pulse is also used to derive average kWh information at the PLC.

### ● ENERGY CONTROLLER

Pulse output from MFM384-C (0.5S) meter can be used as alarm generator or total energy controller by interfacing it with Pre-settable counter and control circuits (Contactors, Relay, Trip Circuit).

The counter is loaded with the maximum energy consumption. When count reaches set point it provides output to control circuit to take appropriate action.

# All fuse types : 0.5A class CC UL type  
0.5A fast acting 600V

(Specifications are subject to change, since development is a continuous process.)

## Selec Controls Pvt. Ltd.

### Factory Address :

EL-27/1, Electronic Zone, TTC Industrial Area, MIDC, Mahape, Navi Mumbai - 400 710, India.

Website : [www.selec.com](http://www.selec.com)

### For Sales & Support,
